PROFESSIONAL SUMMARY

Imdad Malik is an internationally certified SEO Specialist and AI Search Strategist with 3+ years delivering measurable organic growth across competitive international markets — UK, USA, and Pakistan. Expert in Technical SEO, AEO (Answer Engine Optimization), GEO (Generative Engine Optimization), and Google's SGE. He bridges traditional search and AI-powered discovery via Google AI Overview, ChatGPT Search, Gemini, and Bing Copilot. Every strategy is built on deep technical audits, semantic content architecture, advanced keyword mapping and structured data — delivering rankings that are sustainable, algorithm-proof, and ROI-driven. Certified by the University of California, Davis (Coursera, 2025) and Surfer SEO Masterclass (2025).

Internal Linking Architecture	React / Next.js SEO	E-Commerce SEO (Shopify)

CASE STUDIES — INTERNATIONAL PROJECTS

01

Solar Hut Cardiff

United Kingdom · Solar Energy / Home Services · iCreativez Technologies

The Challenge

Solar Hut Cardiff — a local UK solar panel installation company — was struggling with near-zero organic visibility in a fiercely competitive regional market. The website had critical technical failures, thin content with no topical authority, zero schema implementation, and poor Core Web Vitals scores. It was invisible to both search engines and potential customers actively searching for solar solutions.

Strategy & Execution

- Technical Overhaul: Resolved all crawl errors, broken internal links, optimized site architecture, implemented canonical tags. Mobile page speed improved from 42 to 89.
- On-Page SEO: Rewrote all key landing pages with E-E-A-T-aligned content targeting local service keywords. FAQ, LocalBusiness and Breadcrumb schema added for rich results.
- Content Architecture: Developed silo structure covering solar installation, maintenance, grants and geo-targeted local area pages for Cardiff and South Wales.
- Local SEO: Optimized Google Business Profile, built local citations, created geo-targeted landing pages for Cardiff and surrounding areas.
- SGE Optimization: Content optimized for Google's Search Generative Experience — multiple articles now appear in Google's AI Overview section, a top-tier quality signal.
- Keyword Mapping: Replaced generic terms with high-intent commercial keywords aligned with UK solar grant search trends and buyer journey.

Results

Metric	Before	After	Change
Organic Monthly Traffic	~80 visits	200+ visits	▲ +170%
Top 3 Keyword Rankings	0 keywords	12+ keywords	From zero
Page Speed (Mobile)	42 / 100	89 / 100	▲ +47 pts
Featured Snippets	None secured	Multiple secured	✓ Achieved

- ✓ +170% organic traffic growth achieved in under 90 days
- ✓ First-page rankings for highly competitive UK solar keywords
- ✓ Featured snippets + local map pack visibility secured
- ✓ Content appearing in Google AI Overview — strong content authority signal

02

Standard Patches

United States · Custom Apparel / eCommerce · ZNWebPRO

The Challenge

Standard Patches arrived in crisis: 400+ product and category URLs were not indexed by Google — resulting in virtually zero organic visibility for their entire eCommerce catalog. The keyword strategy relied on weak generic terms producing zero ROI. The site lacked content depth, topical authority, and any international targeting structure. This was a full ranking recovery from a complete standing start.

Strategy & Execution

- Indexing Recovery (Crisis): Comprehensive audit identifying all 400+ non-indexed URLs. Root causes: crawl budget waste, orphan pages, improper noindex tags, JS rendering barriers.
- Systematic crawlability fixes, internal linking corrections, forced re-crawl via Google Search Console across entire site architecture.
- Keyword Overhaul: Replaced broad generic terms with niche, high-intent buyer keywords — custom embroidered patches, iron-on patches, woven patch verticals. Full keyword-to-page mapping.
- Country-Targeted Content: Product landing pages built for USA, Canada and UK markets with unique optimized copy. Blog content calendar for topical authority via long-tail questions.
- Schema: Product, BreadcrumbList and Organization schema across all eCommerce pages for rich results eligibility.
- Monitoring: GSC and GA4 dashboards tracking recovery, index coverage expansion and ranking momentum week-by-week.

Results

Metric	Before	After	Status
URLs in Google Index	~50 pages	450+ pages	▲ 800%+
Indexing Recovery Rate	N/A	95% of 400+ URLs	✓ Achieved
Primary Keyword Rankings	Not ranking	Top 1–5 positions	✓ Achieved
Country Pages	0 targeted	USA, CA, UK live	✓ Complete

- ✓ 400+ non-indexed URLs recovered — 95% indexing recovery rate
- ✓ Zero to Page 1–2 rankings — Top 1–5 positions for primary target keywords
- ✓ Complete eCommerce ranking recovery delivered from an absolute standing start

03

Tranzax Vapors

Pakistan · E-Commerce / Vaping (Shopify) · iCreativez Technologies

The Challenge

Tranzax Vapors — Pakistan's established vape brand since 2016, with multiple Karachi stores and a Shopify e-commerce site — was underperforming organically in Pakistan's rapidly growing but highly competitive vaping market. Despite strong offline presence, organic search visibility was fragmented, technical issues went unfixed, and collection pages lacked SEO-optimized structure.

Strategy & Execution

- Shopify Technical Audit: Fixed crawl gaps, indexing issues, duplicate content across product and collection pages, missing meta data site-wide.
 - Keyword Strategy: Targeted high-intent Pakistan vape market terms — disposable vapes, salt nic, pod kits, vape price in Pakistan — plus brand-specific queries across 90+ stocked brands.
 - On-Page Optimization: Collection pages, product titles, meta descriptions and body content aligned with e-commerce search intent and best practices.
 - Content Strategy: Informational content targeting top-of-funnel Pakistan vaping queries — capturing awareness traffic and converting through category and product pages.
 - Local SEO: Multi-location strategy for 4 Karachi locations (Gulshan, Bahadurabad, BMCHS, DHA) — Google Business Profiles optimized and local citations built.
 - Schema: Product, Organization and BreadcrumbList schema for enhanced SERP appearance.
- ✓ Improved organic visibility and keyword rankings across Pakistan's competitive vaping market
 - ✓ Shopify store technically clean — crawl issues resolved, indexing gaps closed
 - ✓ Multi-location local SEO presence established across Karachi

04

SpeedyFunds

United States · FinTech / Online Lending · Freelance

The Challenge

SpeedyFunds operated in the most high-stakes SEO vertical: consumer finance and online lending in the USA. YMYL requirements demand exceptional E-E-A-T signals. The site suffered from poor keyword targeting, weak content authority, and a disorganized internal link structure — resulting in minimal organic traction.

Strategy & Execution

- E-E-A-T Enhancement: Restructured author bios, added trust signals, financial disclaimers and credibility indicators aligned with Google's YMYL guidelines.
- Keyword Rebuild: Replaced broad high-competition terms with transactional and long-tail finance keywords. Resolved duplicate content and hreflang issues.
- ✓ **Top-5 finance keyword rankings achieved — significantly improved organic CTR**
- ✓ **Site established as a credible YMYL resource with measurably stronger visibility**

05

Toolz

United States · SaaS / Productivity Tools · Freelance

Strategy & Execution

- Full crawl audit: JS rendering issues, slow page loads, missing meta data, broken links — all resolved.
- Content aligned to keyword clusters; SoftwareApplication and FAQ schema for rich results in SaaS SERP.
- ✓ **Consistent search ranking improvements and elevated Core Web Vitals metrics**

WHY WORK WITH IMDAD MALIK

International Experience Proven results across UK, USA and Pakistan in finance, solar energy, eCommerce and SaaS — multiple industries, one consistent outcome: growth.	AI Search Ready One of few specialists combining traditional SEO mastery with AEO and GEO for AI-powered search via Google SGE, ChatGPT Search, Gemini and Bing Copilot.
Crisis Recovery Expert Proven ability to rescue sites from zero visibility — 400+ URLs indexed, 95% recovery rate, zero-to-page-1 rankings delivered.	React / Next.js SEO Rare technical capability to implement SEO directly into modern JavaScript frameworks — no rendering blind spots, no dev dependency.
Data-Driven Execution Every strategy built on GSC data, Ahrefs/SEMrush insights and Screaming Frog audits — evidence-based decisions, not assumptions.	Certified Excellence University of California, Davis (Coursera, 2025) + Surfer SEO Masterclass (2025) — academic rigour meets real-world execution.
